

PANAKEIA[®]

we bring
medical innovations
to life

**mission
statement**

**Our mission at Panakeia, LLC,
is to provide the medical
community with unique solutions
and innovative products that
transform patient care and save
lives. We offer exceptional service
and results-oriented marketing
concepts for our clients and
customers and make it our goal
to be the ideal partner.**

about us

Panakeia, LLC specializes in marketing, training and distributing advanced medical products and solutions to the global medical community, including:

- Military
- Pre-Hospital Care and EMS
- Law Enforcement
- Fire/Rescue
- Veterans Administration
- Hospital Critical Care
- Nationally Accredited by The Joint Commission for Home Care
- Manage VA Oxygen Service Contracts

capabilities

- Worldwide distributor of medical solutions
- Custom kitting to meet the exact needs of our customers
- Connect and optimize new innovations and business opportunities for companies wanting to enter the U.S. Federal Government market
- Established relationships within the U.S. Medical Health System, the Veterans Health Administration and various Federal and State government agencies

Saros® Battlefield Oxygen System for Combat Casualty Care

Safe, simple and sustainable, 12 lb portable oxygen concentrator replaces oxygen cylinders and large oxygen generation equipment used in field hospitals, casualty evacuation, and has a replaceable/rechargeable battery for en route care and on the battlefield.

- Emergency and Disaster Preparedness
- En Route Care
- Can be carried and used by first responders anytime, anywhere
- Air-Worthiness Certified
- Oxygen system selected for Special Operations TCCC CASEVAC Set
- Oxygen system selected by the Army for the Oxygen Generator, Field Portable (OGFP) contract.

Product #: 9400-SEQ
NSN: 6515-01-588-3083

Saros Custom-Designed
Packs Also Available

CAIRE[®]
A Chart Industries Company

SeQual Eclipse 5®

- Allows unlimited ambulation for the patient and an all-in-one 24/7 solution to serve their patient's oxygen delivery needs whether at home or on the road
- Only transportable oxygen concentrator with CAIRE's autoSAT® Technology which allows for a customizable pulse dose
 - Adjustable bolus rise time
 - Adjustable trigger sensitivity
- Pulse Dose Settings available up to 192 mL bolus size
- Ability to saturate high continuous flow patients with our advanced pulse delivery

Product numbers vary – please call for information

AirSep® Freestyle® 5

- Provides up to 1000mL of oxygen in a wearable portable oxygen concentrator
- User replaceable battery
- 1-touch operation
- FAA approved for use onboard commercial aircraft

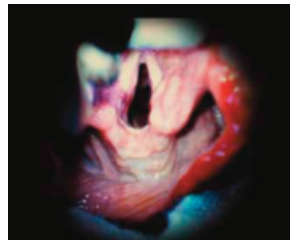

IntuBrite® Hypervisualization Dual-Lighted Blades, Handles and Video Laryngoscope Systems

- Combination of white/UV LED lighting allows for unsurpassed illumination in the airway
- Reflectivity from fluids and tissue in airway dramatically reduced
- Ergonomic handles for optimal entry angles and improved lift direction
- Disposable or Reusable blades and handles
- Disposable handles' batteries have a five-year shelf life
- Hypervisualization system generates 2-4X more lumens than the closest competitor
- Full line of Miller and Mac blades

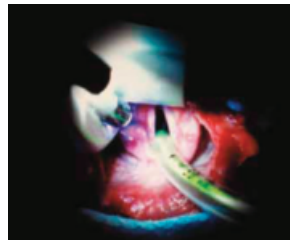

COMPARABLE VIEWS

Cricoid rings clearly visible, cords well defined, anatomy outlined. GRADE 1 (White/Black light)

Comparable view to image to left minimal visual definition. GRADE 1 (White incandescent light)

HyperVisualization of ET tube confirms passage through vocal cords. GRADE 1 (White/Black light)

Comparable view to image to left visualization of the ET tube is lost at vocal cords, passage unconfirmed. GRADE 1 (White incandescent light)

Product numbers vary.

INTUBRITE

VLS 6610 Edge & VLS 6630 Edge Plus

IntuBrite's unique video system makes transitioning from direct visualization intubation to video capability quick and seamless.

- High definition images feature 2X the resolution of competitive technologies
- Patented IntuBrite white/UV LED combination for enhanced airway illumination
- Modular design allows custom component setup for any video laryngoscopy need, in any environment
- Attachable handle-mounted monitor/DVR with tilt and 360 degree swivel capability
- Still picture and video recording capability via removable SD card for documentation and retention
- Higher quality video system with more capability at less cost than comparable competitor devices

Product #: VLS6610
Product #: VLS6630

XSTAT®-30

A revolutionary hemostatic medical device engineered for the control of severe bleeding of wounds not amenable to tourniquet application in adults and adolescents.

- First-in-kind hemostatic device for the treatment of gunshot and shrapnel wounds
- Works by injecting a group of small, rapidly expanding sponges into a wound cavity using a syringe-like applicator
- Sponges expand and swell to fill the wound cavity within 20 seconds of contact with blood, thereby creating a temporary barrier to blood flow and providing hemostatic pressure
- Each sponge contains a radio-opaque marker easily visible via x-ray

Product #: 30-305 - XSTAT-30 Three Pack
NSN: 6510-01-632-9440

Product #: 30-315 - XSTAT-30 Single Pack
NSN: 6510-01-644-7335

REV MED X™

XSTAT® Training System and Mannequin

Train with the entire XSTAT® series on a specially designed mannequin including refillable XSTAT®-30 training applicators.

Complete Training Kit

Kit includes:

- One mannequin
- 3 training applicators
- 1 bag demo sponges
- 1 bag demo pellets

Product #: 30-324

Applicator Kit

Kit includes:

- 3 training applicators
- 1 demo sponge bag
- 1 demo pellet bag

Product #: 30-325

- Training applicators – Product #: 30-320
- Demo Sponges – Quantity: 600 – Product #: 30-322
- Demo Pellets – Quantity: 300 – Product #: 30-323

XSTAT®-12

- Designed for penetrating trauma with a narrow and deep wound track.
- The 12mm tip allows for application into smaller wounds
- Sold in three packs
- Individually sterilized
- Approximately 38 sponges per applicator

Product #: 30-312

NSN: 6510-01-657-4737

REVMED ™

SharkBite™ Modular Trauma Kit

- For treatment of large blast injuries, bi-lateral amputations, large surface burns, and packing of large cavities
- Kit includes: AirWrap® XL bandage, XGauze® dressing, and RevMedx Trauma Dressing

Product #: 30-304
NSN: 6510-01-640-7857

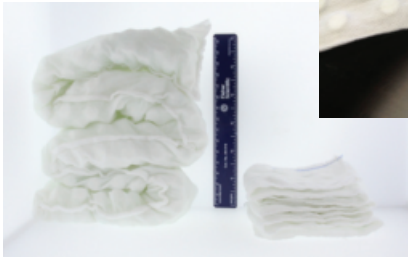

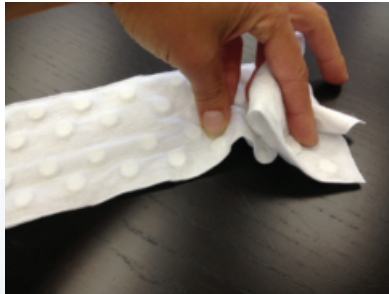

REVMED[™]**X**

XGAUZE® Trauma Dressing

Revolutionary advancement in wound dressings.

- 3" x 36" z-folded dressing
- Embedded with non-hemostatic treated expanding sponges
- Expands upon contact with blood or exudate
- Expands 10X its size in the wound creating a barrier to blood flow

XGAUZE expanded and in compressed state

Product #: 30-301
NSN: 6510-01-643-5391

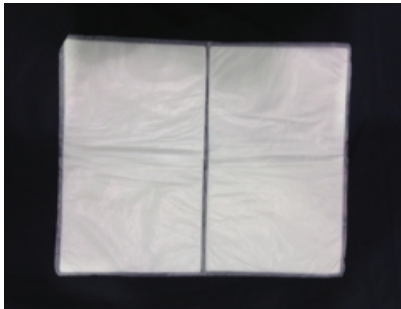

REVMED X™

RevMedx™ Trauma Dressing (RTD™)

The RevMedx™ Trauma Dressing (RTD™) is a sterile, 15" x 18" multi-use absorbent dressing that is non-adherent on both sides. It can be torn in half (9" x 15" each) for the treatment of a variety of wounds and surfaces. The RTD comes in a flat package (non-vacuum seal) as well as a compact (vacuum sealed) package.

- Two Packaging Options
- Sterile
- Latex Free
- Non-adherent
- Class One Dressing

Product #: 30-308 (Non-Vacuum Packaged)
NSN: 6510-01-643-5133

Product #: 30-309 (Vacuum Sealed Package)
NSN: 6510-01-643-5434

REVMED 

AirWrap® Hands-Free Compression Bandage with Integrated Inflatable Bladder

AirWrap 4"

Provides true hands-free direct pressure over a primary wound in order to control bleeding.

- Applies focused pressure on a wide range of wounds
- Pop-up indicator signals user when bladder is inflated
- Greatly reduces blood loss when used in conjunction with leading hemostatic bandage
- Functions in extreme conditions and at high altitudes

Product #: 30-300

NSN: 6530-01-643-5297

AirWrap XL

- 6" compression bandage with inflatable bladder
- Applies focused pressure on a wide range of wounds
- 18" longer than traditional 6" elastic wrap
- Compact and lightweight
- Removable air bladder for flexibility of use
- Functions in extreme conditions
- Available for military and civilian first responders

Product #: 30-330

NSN: 6530-01-657-1978

AirWrap XL

TX2™ & TX3™ Tourniquets

The TX™ Series tourniquets are the latest generation of high strength compression devices designed to control venous and arterial bleeding.

- Made with a heavy duty ratchet control system designed to be applied with one hand to increase or decrease pressure
- TX2™ loop assist provides a true one-handed application capability which is simple and intuitive
- TX3™ is a 3-inch extended care tourniquet and is designed for longer evacuations where pain control and nerve damage are a major concern
- Virtually indestructible and can be used repeatedly in training scenarios

TX3 Product #: 30-303
TX2 Product #: 30-302

REVMED X™

PARABELT™

Everyday use MILSPEC utility belt with an integrated ratchet tourniquet.

- Ratcheting system allows for quick tightening and fine adjustment
- Includes thumb loop that doubles as a bite strap for single-hand application
- Ideal for use in non-combat areas where first response equipment is not readily available
- Certified military webbing
- Rated 18kN AustriaAlpin COBRA® frame buckle

ParaBelt™ is available in various sizes and colors. Call for information

REVMED X™

MOVES® SLC™

The MOVES® SLC™ mobile intensive care unit is a life support system with a built-in oxygen concentrator, ventilator, suction system, vital signs monitoring module.

- 50% smaller and 60% lighter than standard transport life support systems currently in use
- Support for mounting up to 3 infusion pumps or a defibrillator
- Attaches to a patient stretcher and is compact enough to fit in any vehicle, rotary, or fixed wing aircraft
- Designed for use in medevac transport or mass casualty disasters
- Weight: 17kg (37lbs.) excl. batteries/clamps
- Battery weight 1.5 kg (3.3 lbs.) each
- Battery: Lithium polymer:
Typical: up to 6 hrs/ set of 2
Minimum: 2.5 hrs / set of 2
Charge time: 2.5 hrs / set of 2

Product #: 126666

ING OS1st® Brace Layer System™

- Powered by Compression Zone Technology®
- Medical grade orthopedic bracing support with the power of graduated compression
- Easily slip on and fit under any clothing or equipment
- Prevention of common injuries, pain-free performance and a quicker return to Active form

This breakthrough technology delivers medical grade support in sleek and powerful performance bracing sleeves, providing precise graduated compression that surrounds joints, muscles, tendons, and ligaments with anatomically correct zones for enhanced circulation, to support and stabilize joint structure, and to speed recovery.

The result? Prevention of common injuries, pain-free performance and a quicker return to your active lifestyle.

Performance Bracing Sleeves:

- Ankle
- Calf
- Elbow
- Foot
- Foot + Calf
- Knee
- Wrist

Available in various colors and sizes.
